## HERBS *for Flavor and Fragrance*

PLANTS GROWN ESPECIALLY BY THE COTTAGE HERB FARM  
FOR SCENT, SEASONING AND SENTIMENT  
IN YOUR GARDEN

Herbs are the least exacting of plants. They are easily grown. Will flourish in common soils, asking only plenty of good strong sunshine. A southern exposure, or better still a southern slope is admirably suited to their taste.

They are winsome and sociable plants, and will combine delightfully with other perennials and annuals in the border, can be quaintly clumped in old fashion beds, or in the formal patterns of a "Knot" garden.
